ATRIUM
ACCESS CONTROL

ATRIUM Integrated Access Control System offers you a complete access control solution. ATRIUM is geared to perform and gives you a level of **flexibility** and **highest security encryption** never seen in the industry.

Enhance security by eliminating the need for keys, which are easily lost or duplicated and disappear when terminated employees fail to return them. Access cards can be disabled instantly, or tagged with “lost”, “stolen” or “invalid” status.

Access privileges can be modified on-line in real-time without issuing new cards. Visitors can be granted access privileges in seconds, for temporary access situations. **Enhanced supervision**, track specific individuals, and get daily reports on their movements. Monitor traffic in highly sensitive areas for maximum security.

ATRIUM grows with you as the needs of your facility evolve, ATRIUM can easily be expanded to conquer any access control challenge.

Email Notification

ATRIUM can automatically send an e-mail based on any events (access violation, door forced open, alarm, etc.) reinforcing your site's security.

Camera Integration

ATRIUM can associate a specific access control event with a video recording and lets you playback up to 30 seconds before and after that event. It also lets you capture a video image (frame) during the playback or live camera viewing.

Lockdown Feature

The safety of students, colleagues and friends is a priority during an armed attack. Be safe with ATRIUM's "Lockdown" feature by locking all doors at once. Authorized persons can be permitted to access the premises during the lockdown and confirm that an area is secure. All lockdown events are displayed in real time from your ATRIUM software, a web browser or your smartphone.

Informative Reports

ATRIUM report enables you to print detailed reports of your company activities. Track the accesses of a specific employee, verify who accessed a specific door at a precise date and time.

CDVI proximity card readers are **recognized worldwide**, having **won several awards** for their innovative design. CDVI has a full and varied range of proximity card readers to meet all of your needs. This includes mini, mullion, vandal-resistant and card reader/keypad combinations.

Fingerprint readers, wireless transmitters and many other security devices can be managed to provide you the **flexibility** and **performance** that you expect. The ATRIUM system can **scale to the needs** and ever-changing environment of your business.

CDVI has established itself as the unchallenged industry leader in the design and development of access control systems. With over 30 years in the market, CDVI is redefining the possibilities of access control technology.

With it's total focus on complete customer satisfaction, CDVI is setting new standards of user-friendliness, and meeting the challenge of harnessing the very best that technology has to offer, at an affordable price.
